SURFORMA®

SURFORMA® history is as much about fidelity to the past as it is about looking into the future with the constant development of new approaches and techniques, always focusing on innovation and sustainability.

The new **Surforma® Collection** was created to generate Human Emotions.

Sustainability & Environment

At **SURFORMA®**, we continually strive to create innovative products that support sustainable design and contribute to a healthier environment. We are committed to developing an eco-friendly and conscientious work at all levels – economic, ecological and social.

At the heart of **SURFORMA®**'s environmental policy is its active engagement to reduce the impact of its activities on the environment throughout all stages of the manufacturing process and life cycle of its products: efficient use of resources, increase recycled and eco-friendly content in our raw materials, energy and water saving, waste reduction and indoor air quality enhancement.

The positive trend in the reduction of energy and water consumption is proof of the commitment to implement measures that promote a better efficiency in the process, aimed at actively and voluntarily reducing and mitigating environmental impacts.

Surforma is inserted in a cluster of **Sonae** companies where the use of renewable energies and energy production for self-consumption is promoted.

We develop improvement activities and projects that integrate the "product life cycle" perspective into their operations. More than 97% of the waste generated in our activities is reused, recycled or used to produce energy (WtE).

Safety & Well-being

Safety is an essential pillar for Surfoma.
We are responsible for each other every day, so that everyone returns home safely.

We work daily to reduce occupational risks and contribute to a healthier environment, prevent diseases, and have zero accidents.

The concern with the health and well-being of its employees is another of Surfoma's challenges, which through the various services available and recreational activities promoted at Sonae Campus (where it is located), provides comfort and satisfaction to its employees.

Services covering several areas are available, such as medical support, nutrition services, nursing, and clinical analyses in the "Health & Nutrition", several food options with healthier choices in the different restaurants and a beauty salon "Beauty Lab".

There are several spaces aimed at promoting physical health, such as a gym, padel tennis courts, football field and bicycles available to ride along the various surrounding green paths.

The community farmer garden is one of the examples of teamwork maintained by volunteer employees, where the produce grown is donated to a social charity institution.

Certifications

SURFORMA® has an integrated management system and thus fulfils its commitment to continuous improvement and ensures knowledge of and compliance with clearly defined requirements in all areas.

Scope of the integrated management system – ISO standards

As part of the Management System, the requirements of different norms and standards are addressed.

- ISO 9001: Quality management
- ISO 14001: Environmental management
- ISO 45001: Work safety

Our due diligence system for tracing the origin of wood – FSC® & PEFC standards

The well-known certification systems for sustainable forest management FSC and PEFC are equally evaluated by us to ensure traceability of timber throughout the supply chain, from harvest through to the finished product as a proof that the wood originally comes from certified and sustainably managed forests and other controlled sources.
In addition to providing assurance, FSC and PEFC certified materials can also support customers’ LEED and BREEAM certification strategies.

FSC® C111655	Standard	FSC STD 40-004 V3-1
PEFC	Standard	PEFC ST 2002:2020

Our approach to product transparency and eco-labelling - EPD, Greenguard, NSF,

SURFORMA® stands for full product transparency and a verifiable, factual representation of environmental properties. To this end, we pursue various approaches.
The externally verified EPD (Environmental Product Declaration) contains the results of a cradle-to-gate life cycle assessment. This data enables planners, designers and architects to make informed product comparisons from an environmental perspective. Our EPDs for HPL and Compact are verified by the Institut Bauen und Umwelt e.V. (IBU).

When product bears GREENGUARD certification, it means that it’s been tested for more than 10,000 different chemicals and only the most harmless ones are allowed. It hasn’t just met indoor air quality limits but is also meant for indoor spaces.
By choosing products with GREENGUARD Certification, you’re keeping your indoor environment healthier for you, your family and all your workers.
Surforma HPL post forming grade has GREENGUARD Certification.

The NSF mark assures consumers, retailers and regulators, that certified products have been rigorously tested to comply with all standard requirements. Surforma laminates were tested under the stringent NSF/AISI 35 Standard and their certification ensures the food security.
Only products appearing in the NSF official listing are authorized to bear the NSF mark and are published on Surforma website.

Scope of the integrated product and management system for the safety and security of shipping - IMO MED

The mandatory safety equipment that must be carried on board each ship is defined at international level by the International Maritime Organization (IMO). Equipment standards are set by different standardization bodies, including the International Organization for Standardization (ISO), the European Committee for Electrotechnical Standardization (CENELEC) and the IMO. Through the Marine Equipment Directive 2014/90/EU, the European Union has acted to harmonize testing standards and certification for marine equipment in the EU. This is carried out by specialized entities, the Notified Bodies. Surforma have certification Module B for HPL post forming and fire-retardant grades and Module D for Product Quality Assurance.

Scope of the integrated product for the safety and security of railway - EN45545

EN 45545 is the mandatory European standard for materials used in the manufacture of rail vehicles.

Today, all materials used in rail vehicles must follow the EN 45545-2 standard in order to achieve the highest level of safety possible in the event of a fire.

The standard applies to rail vehicles, including high-speed trains, regional trains, streetcars, subways and double-decker trains.

It aims to protect passengers and staff from fire on board railway vehicles.

Products are classified according to 26 requirement sets **(R1-R26)** depending on where the materials are used.

These requirements specify various fire tests that materials and components must pass to comply with a certain Hazard Level.

Railway vehicles are classified in accordance with the fire **Hazard Level** associated with their design and operation category.

The classification depends on how many kilometres the trolley is in tunnels and whether it is automatic, two-storey or if sleepers are on board.

It is estimated that approx. 90% of all trains must comply with HL1 or HL2.

OPERATION CATEGORY	DESIGN CATEGORY			
	N STANDARD TRAINS	A AUTOMATIC TRAINS	D DOUBLE DECKED TRAINS	S SLEEPING VEHICLES
1 - NO TUNNELS	HL 1	HL 1	HL 1	HL 2
2 - TUNNELS MAX. 5 KM	HL 2	HL 2	HL 2	HL 2
3 - TUNNELS > 5 KM	HL 2	HL 2	HL 2	HL 3
4 - NO SIDE EVACUATION	HL 3	HL 3	HL 3	HL 3

Surforma offers a wide range of fire retardant HPL & Compacts classified as **HL2 - R1**

R1 requirements for interior horizontal/vertical surfaces, e.g. ceiling and walls, window frames, luggage storage areas, tables or display screens.

Color for all

The colors we choose are a mirror of ourselves, the reflection of our essential nature and the values we believe in.

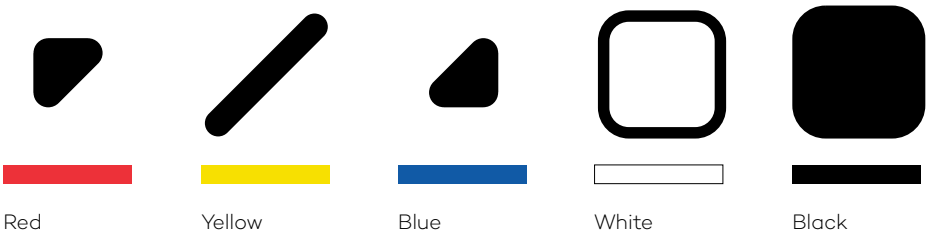

Always at the forefront of color management and innovation, SURFORMA® has adopted the universal color code for color blind people - **the color alphabet code**.

It is a monochrome graphic code which allows color blind people to identify colors quickly and easily, in a process of logical association and easy memorization. The code is developed from the primary colors (blue, red and yellow), represented by graphic symbols, with a consequent allocation of these to secondary colors. Black and white are also represented by symbols to distinguish darker and lighter tones of primary and secondary colors.

Color Alphabet code becomes "a mental game" easy to memorize and apply in daily situations.

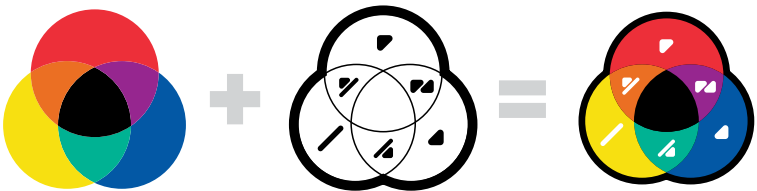

Graphic Concept

The Color Alphabet code designs three basic elements symbols representing the three primary colors — red, yellow and blue. White and black are used to indicate lighter and darker tones.

The code

Through the acquired knowledge of the "Color Addition Theory", the Code Symbols can be related and the entire color palette identified.

Color Addition Theory

Primary and secondary colors

Black and white, grey, gold & silver

Light shades

Dark shades

Product Portfolio

Product Portfolio

SURFORMA® HPL is a high-pressure laminate suitable for indoor use, where design, quality and resistance are key to your project's success. Particularly resistant, durable and hygienic, this product is suitable for high impact and wear situations, both horizontal and vertical applications, in public, commercial and residential areas.

Available in standard, postforming, fire retardant and high abrasion variants, it combines performance and versatility to create unique bold spaces.

Surforma® laminates meet the most stringent requirements of EN 438 and NEMA LD-3 and are available with IMO MED certification.

The products have GREENGUARD and NSF certification.

They can be applied to any horizontal or vertical surface such as furniture, walls and floors, creating an array of different possibilities and combinations, for exceptional environments.

SURFORMA® CPL is a thin, resistant, and flexible laminate representing an ideal surfacing solution for doors, profiles, wall claddings and furniture. Available in Flex grade in roll for wrapping profiles and doors and CPL postforming variant for doors, claddings and furniture. The CPL laminates meet the most stringent requirements of EN 438.

SURFORMA® COMPACT solutions can withstand high impacts, thus ensuring reliability and safety. Suitable to be used in indoor environments with demanding conditions, such as high wear and tear or humidity levels. SURFORMA® Compacts are the perfect ally in difficult environments due to their structural stability and high resistance.

Surforma® Compacts meet the most stringent requirements of EN 438 and NEMA LD-3.

All SURFORMA® Laminates variants are a treated, chemically inert material, classified as non-hazardous, which means that REACH classification is not applicable and it is environmentally neutral.

SURFORMA® products have **antibacterial** properties, in accordance with the Japanese JIS Z 2801 standard.

Additional **antiviral** features can be added to HPL and Compact on request for safer and cleaner performance.

New Decors

Pleasure **NEW**
L5240

A warm tone that combines with earthy, woody and caramel tones. Creates an organic, cozy and creative atmosphere.

Discrete **NEW**
L5239

A neutral color to bring sophistication and versatility to the environment. Play with textures and contrasts to create visual interest.

Slate Grey **NEW**
L6287

This graphite tone brings modernity and elegance to the environment. It matches industrial style and cool background colors.

Colosseum White **NEW**
F2328

A vibrant travertine stone infuses any space with an elegant yet dynamic ambiance. With its warm, natural hues and unique movements, it brings charm and timeless beauty to both modern and classic interior designs.

Riva Earth **NEW**
M6360

An elegant and harmonious structure. Small knots, delicate scratches – these all give to Riva decor the natural character of classic veneer. The perfect alternative to the ubiquitous oak for interior elements whether in furniture or decoration, creating a serene and inviting atmosphere.

Riva Ice **NEW**
M6361

Riva Ice captures the essence of light natural wood with a soft, elegant appeal, to create bright and modern environments, almost ethereal... **Riva Earth**, a warm tone allows us to connect with nature, making spaces more organic, intense and, above all, comfortable.

Olivia Oak NEW
M6363

A noble and classic Oak. Its soft, linear flow lends a timeless charm, making it an ideal choice for crafting cozy, inviting spaces in both contemporary and classic interiors.

Olivia Oak Pale NEW
M6364

Olivia Oak Pale gently accented by golden undertones and distinguished by an elegant, finely textured grain. **Olivia Oak** emanates natural warmth for an elegant and classic style.

Heritage NEW
M6370

Heritage appeals to the senses with an original look that captures the essence of Hickory, a trusted wood known for its lightness and durability. Planks with a whole and full flower, kept narrow and not too dominant, alternate with narrow stripes. Heritage evokes movement and rhythm-like a laidback.

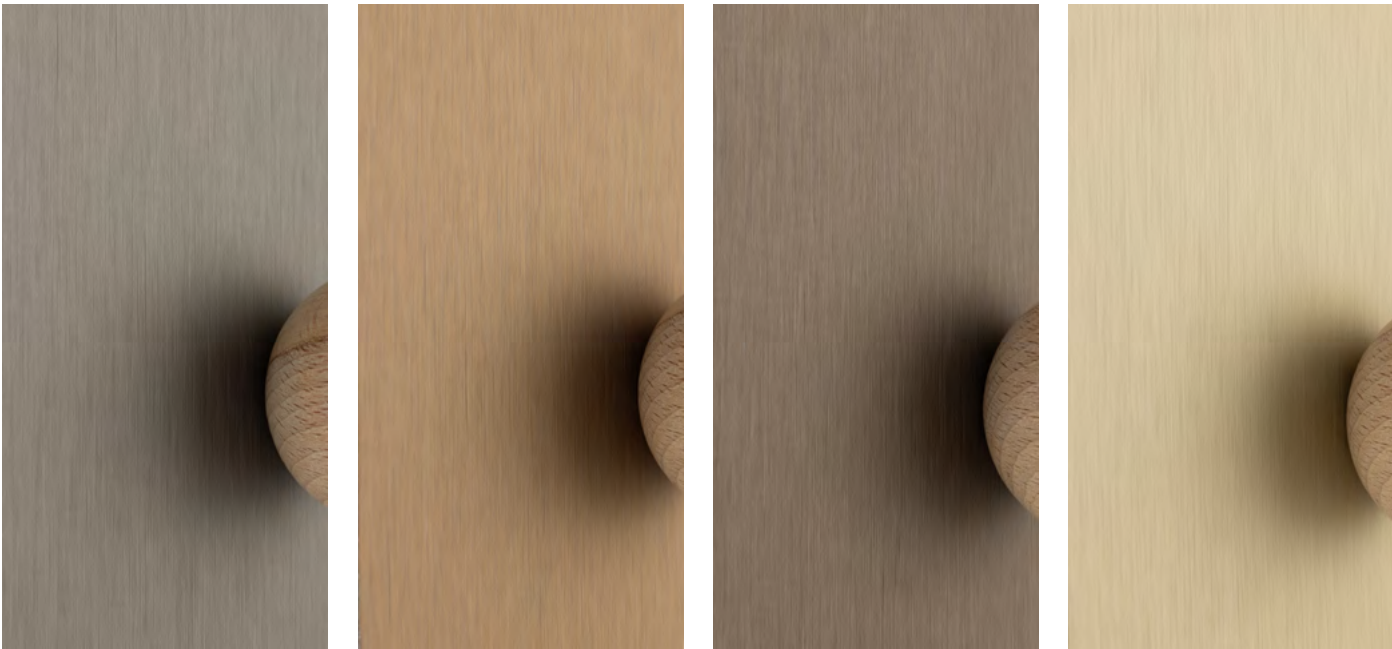

Sense Oak NEW
M6371

With closely grown stripes and medium-sized flowers. Large knotted growths bring additional momentum to the overall effect, providing a basis for modern, appealing room designs.

New Metals

ANTI-FINGERPRINT AFM collection - Please, DO touch!
The sexiest new feature, deliver on their promise on both vertical and **horizontal** surfaces in many applications. Beyond functionality, this finish has a beautiful, velvety, expensive feel that makes it impossible NOT to touch them.

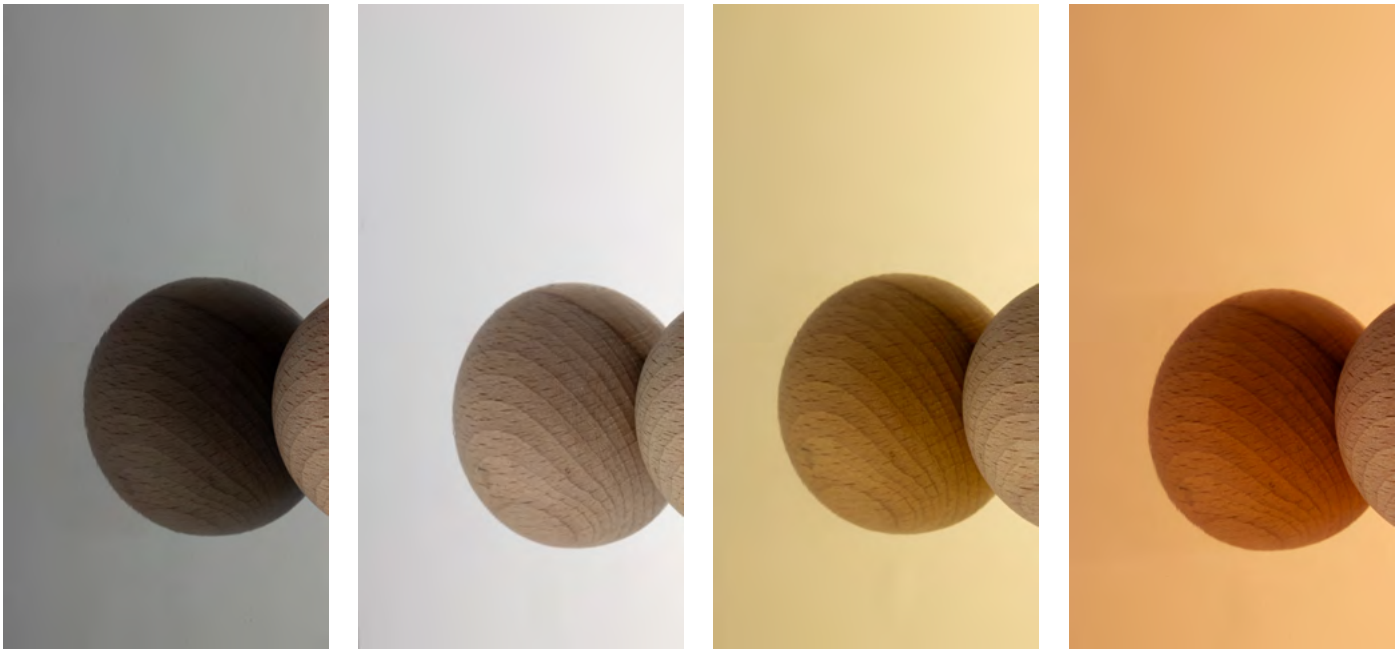

Steel **NEW**
L512

Brass **NEW**
L513

Earth **NEW**

NEW 3Design Compact

Surforma 3Design Compact represents a significant innovation combining the high surface performance of a traditional HPL Compact with the surface molding capability.

The primary advantage of the Surforma 3Design Compact is its ability to be molded into three-dimensional shapes, making it ideal for use in furniture elements and wall claddings. Its distinct aesthetic, with textured and raised surfaces, can transform the look of the space while providing greater durability and resistance to everyday use.

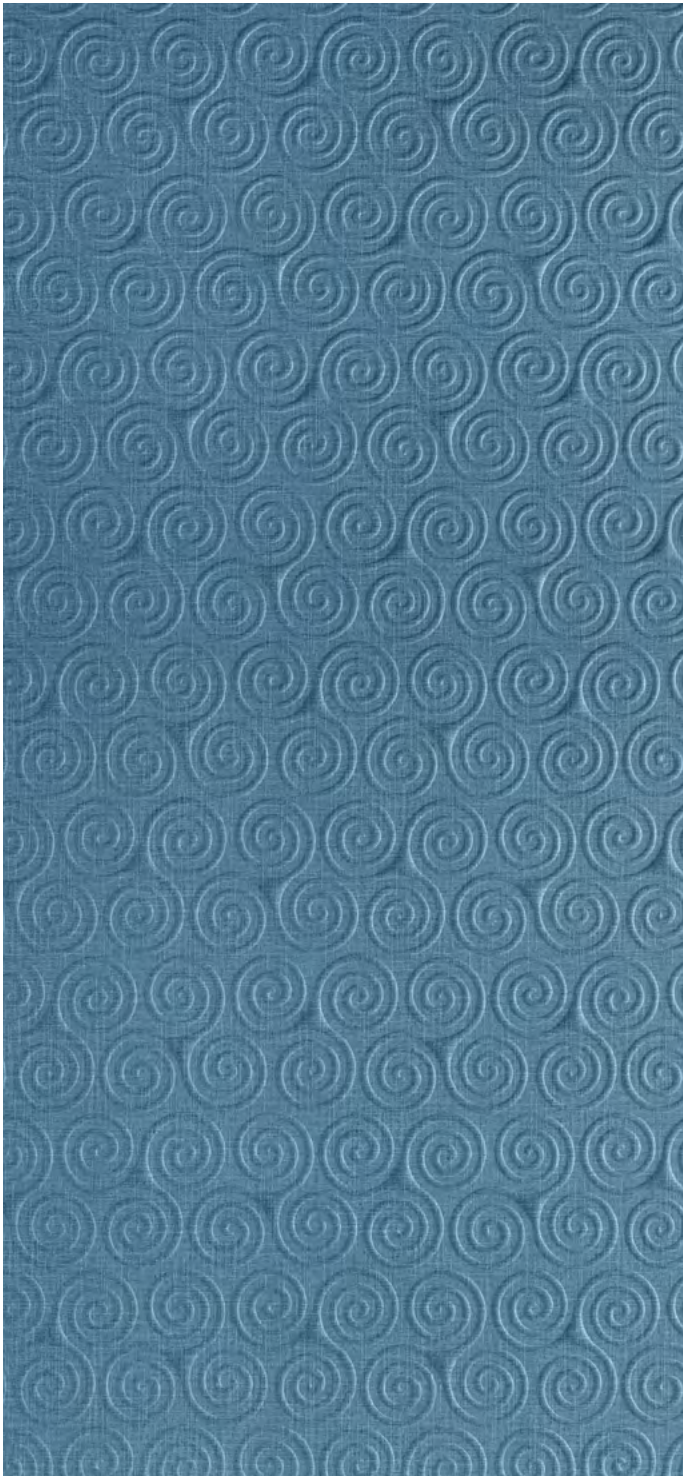

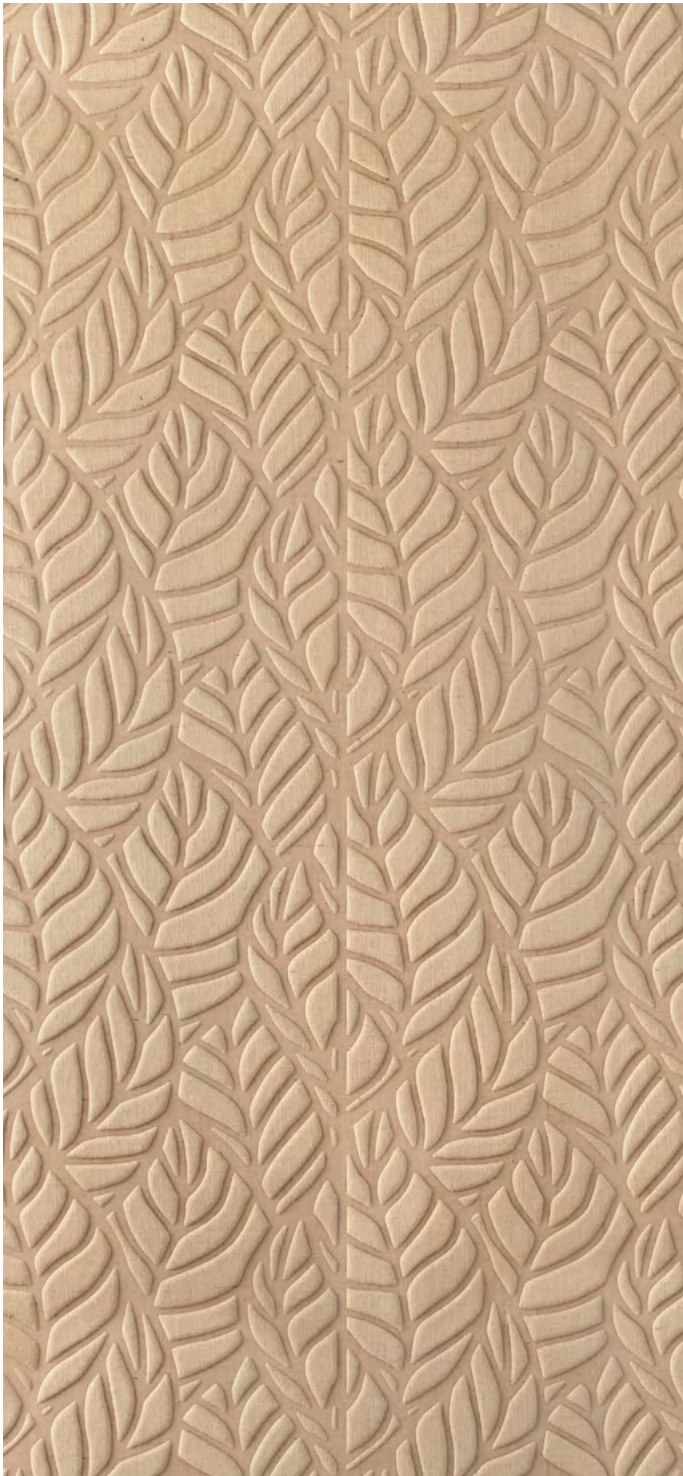

This innovative 3Design Compact, with its versatility and resilience expand its potential applications, opening new opportunities in interior design offering high levels of customization for modern and bold spaces.

Get inspired by the available 3D shapes!

Challenge us to shape your ideas...

NEW ECO Compact

Surforma new decorative line of ECO Compacts is designed to provide a sustainable alternative to conventional materials, incorporating recycled tires, cork waste and EVA waste from the footwear industry, along with subproducts from Surforma’s main production process. This unique approach in the use of recycled and upcycled materials helps reduce waste and makes efficient use of resources, supporting the overall goal of a more sustainable future.

This eco-conscious composition delivers exceptional durability along with very high water-proof and humidity resistance, making it ideal for demanding indoor environments.

ECO Compact can be widely used for furniture, lockers, residential partitions and wall claddings. Its broad range of decors and textures supports both practical and aesthetic design goals.

Whether creating bold, modern designs or more classic and subtle interiors, Surforma® ECO Compact offer the perfect combination of sustainability and style.

NEW WarmIN Terrace Table

Imagine enjoying the outdoors, even when the temperature drops, with a table designed not only to bring warmth but also to make your outdoor terrace a cozy and inviting space. This innovative table is equipped with integrated heating technology, providing warmth right where it's needed, so you can relax comfortably in colder weather.

What sets this table apart is its commitment to sustainability and comfort without wasting energy.

The Surforma® WarmIN terrace tables are efficient and sustainable, designed to reduce energy consumption. Unlike typical terrace heaters that can consume up to 13kWh or 1kg of propane per hour, WarmIN needs only a fraction of this energy. Studies we commissioned to Semcon, part of Knightec Group, show that the warmth is two times better than the conventional terrace heaters.

The innovative design of the WarmIN table uses ecological and energy-saving materials to minimize its environmental impact. The product incorporates the Halia® warming technology patented by The Warming Surfaces Company Ltd. By using cleaner energy and efficiently focusing thermal elements close to people, the table creates a cozy atmosphere. This makes it not only an eco-conscious option but also a practical and cost-effective solution to warmth efficiently while reducing your carbon footprint.

It's the perfect combination of energy-saving, sustainable design and warmth, making your outdoor space both cozy and eco-friendly.

SILK HPL and Compact
anti-fingerprint

SILK HPL and Compact anti-fingerprint

An elegant and warm to touch laminate with unique features.

The surface has thermal healing properties for superficial micro scratches, low light reflectivity thanks to its extreme opacity and matt finish as well as anti-fingerprint feature. SILK offers even more, an innovative free phenol core which stand out this new product.

SILK is suitable for both horizontal and vertical applications. It can be used in a wide range of interior designs, for home, hospitality, healthcare and commercial applications: e.g. kitchens and bathrooms, work surfaces, furniture, construction, doors and wall claddings.

Through-Color core COMPACT with anti-fingerprint features.

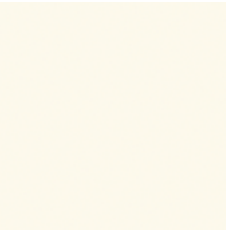

Combine high structural performance with the luxuriousness of anti-fingerprint surface.

Black and White core to enjoy simplicity and elegance. From the lightness of white to the depth of black. Delicate white and intense black marbles to inspire timeless designs and unique interiors.

Enhance your most prestigious furniture and fitting projects.

Labgrade Compact

The best solutions for safe and durable laboratory, research and educational environments.

Laboratory and functional environments demand compliance with rigorous codes and standards. Therefore, to support your right material selection, Surforma offers a wide Laboratory solutions range, that ensure the lifetime of your laboratory worktops and furniture.

SURFORMA® Labgrade manufactured with unique Electron Beam Curing (EBC) technology, is easy to clean and shows a high resistance to a large number of aggressive chemicals and cleaning agents. It also has inherent antibacterial properties.

This compact provides an ideal choice in environments where hygiene, avoidance of contamination, sustainability, ergonomic and safety are of importance. SURFORMA® Labgrade is extensively used in a wide variety of lab environments worldwide, including chemical, physical, analytical and microbiological laboratories.

CompactShield

Ballistic Decorative Compact

A growing consciousness of the threat associated with armed conflicts, terrorist acts and wars led Surforma to develop and introduce solutions for life protection to its portfolio.

CompactShield by Surforma® is ideally suited for public either residential spaces in a variety of applications including doors, wall cladding and interior fittings and partitions, for the sectors of government and military buildings, banks, education, hospitals and healthcare, hotels and restaurants, offices, shops.

CompactShield is also particularly interesting for transportation industry such as trains, buses or airplanes because of the lightweight and reduced thickness characteristics.

Surforma offers a wide range of decorative variations of CompactShield with the ultimate goal of satisfying the requirements from interior designers and architects.

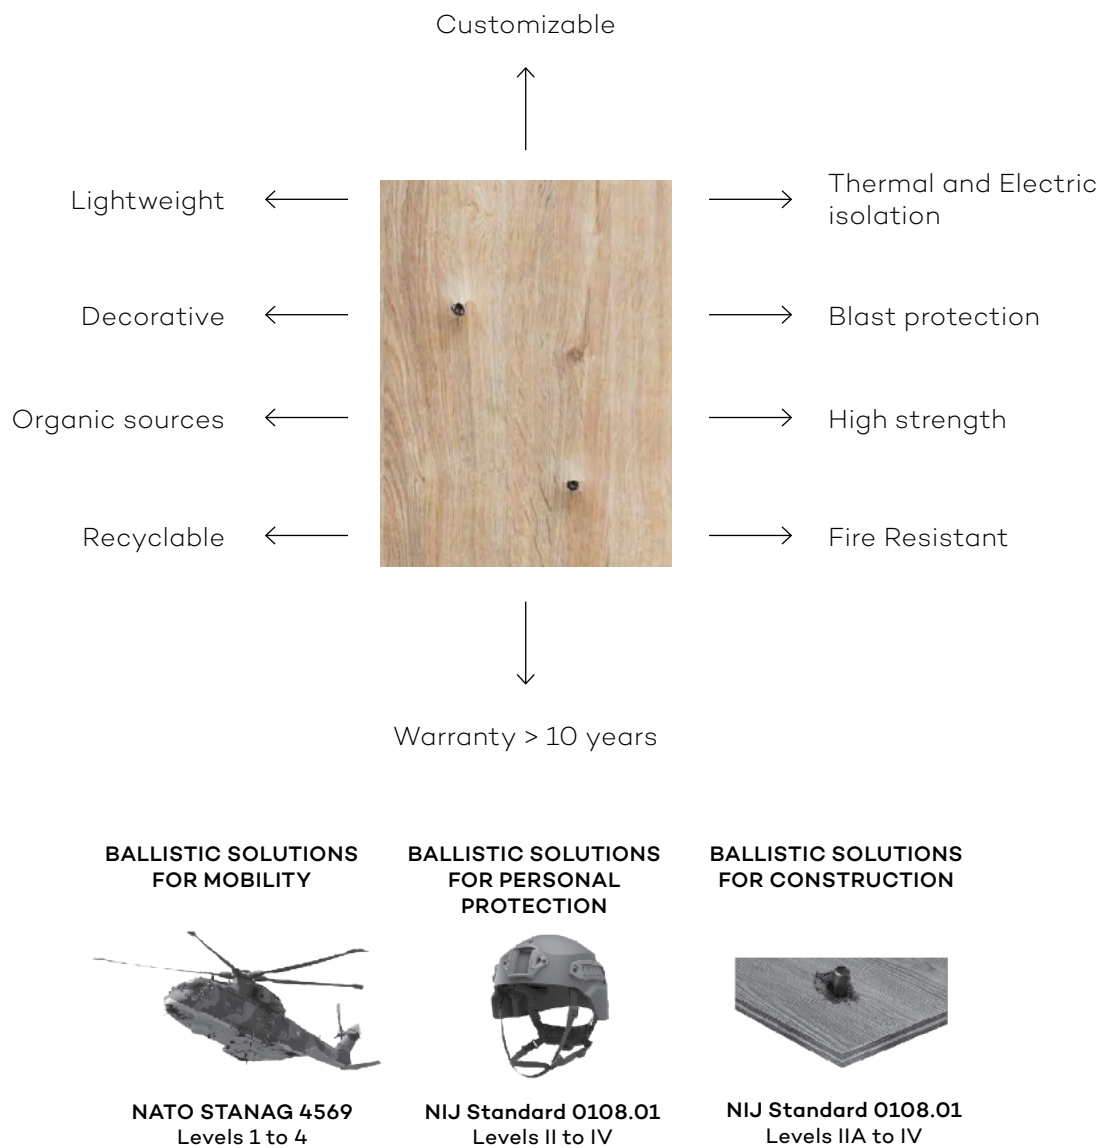

CompactShield with **decorative surface**, according to EN 438, is an excellent material for indoor surfaces, either horizontal or vertical where design, appearance, quality and durability are important features.

The double-sided decorative CompactShield meet the stringent requirements for hygiene, resistance to abrasion, scratches, stain and resistance to heat from ordinary sources, dimensional stability and mechanical properties.

The product can also be provided without any decorative surface for inclusion inside a wall or door structure.

The CompactShield **without decorative surfaces includes a functional layer** specifically developed to create a structural combination, enabling the composites to be glued to other materials such as metals and ceramics.

A sleek, lightweight ballistic compact crafted with advanced materials for effective protection.

Several levels of protection are available as per standards NIJ 0108.01, BS EN 1063 and BS EN 1522

For military application, the standard used is NATO STANAG 4569.

From conception to production, entirely Portuguese.

For more detailed information please refer to the specific CompactShield brochure.

Visit our website www.surforma.com and download the brochure.

General Collection

Surforma® is the brand of decorative Laminates and Compacts that offers versatile and contemporary solutions for interior spaces.

The new Surforma® Collection was created to generate Human Emotions.

Considering the challenges of the future and the growing need to reconnect with nature, Surforma® returns to our roots and offers us authentic and sustainable designs that feed our innate attraction to nature.

A more playful approach full of fluidity, creativity and fun are connected in the surface design to bring a touch of optimism and wellness to interiors.

Surforma® presents you with warmer natural-looking woods. Stones, cements, metallics & textiles sprinkled with vivid details, distinctive colors and a natural and tactile textures to turn your ideas into reality.

SURFORMA® has gathered the best offer to give soul to your projects.

Finishes

“...my fingers-eyes slowly unveil exciting mysteries...”

The texture is felt or touched, with our eyes and our hands!

The harmonious feel which complements the decor image completes the overall design.

The character, depth, and naturalness of the finish brings each decor close to the original.

You can therefore create outstanding projects to the full satisfaction of your customers.

Plain Colors

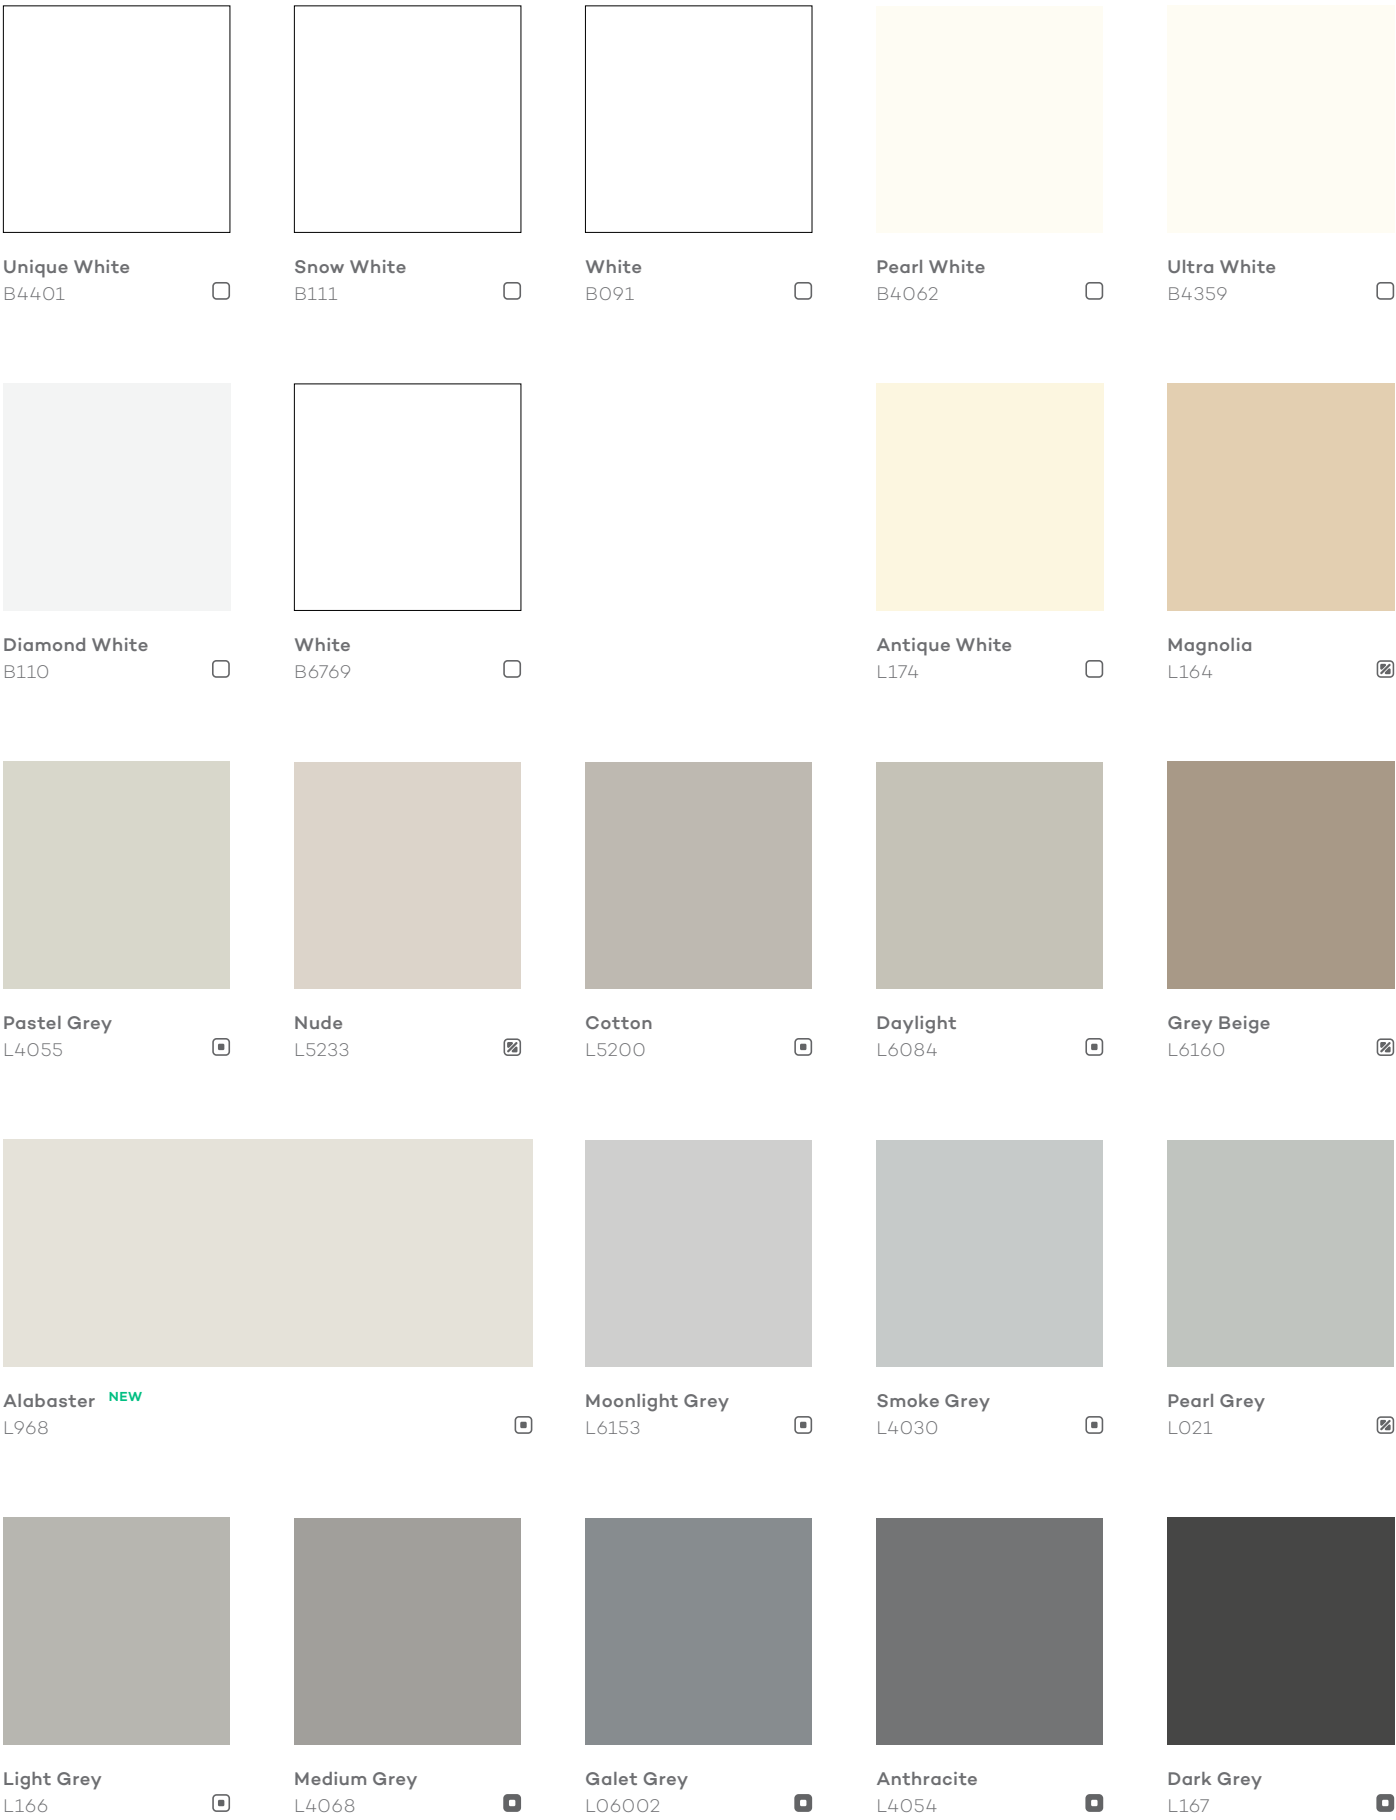

“...the color that drips from my earth fingers and my sea eyes paints the deserted sands...”

Neutral, light and sober tones begin share the role with more vibrant, expressive and saturated colors.

Lighter tones that evoke water and air with their lightness and clarity, symbols of stillness, create spaces with a peaceful and fresh atmosphere.

Powerful tones, which explore desire, passion and empowerment, for new and bold approaches.

Colors promote creativity and diversity in interior design.

Mineral & Metallic & Textile

“...from the friction of two stones, sparks come out; from sparks comes fire; from fire light springs...”

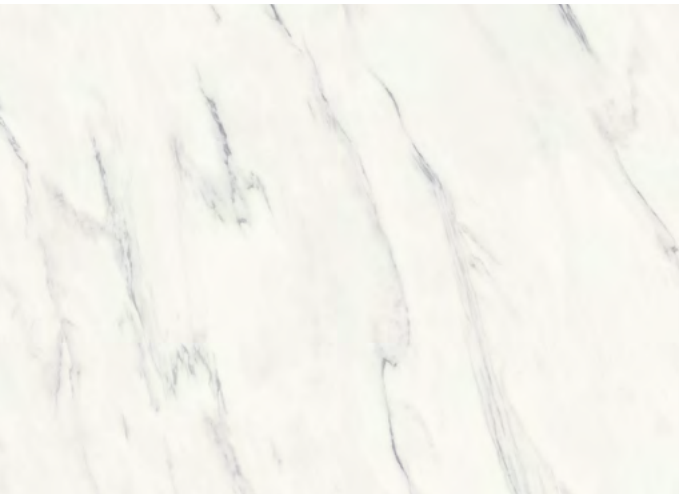

Minerals are materials of many impressions, a union of power and subtleness. This combination speaks to the smart elegance.

Metallics generate a refreshing and modern effect on decoration. The elegance of silver, the sophistication of gold, the warmth of copper and the delicacy of rose gold.

Textiles with rich tones and textures, promote cozy and pleasant feelings creating a light, organic, somewhat bohemian atmosphere.

A range full of flavor and color for vibe projects.

Woodgrains

“...I went to the Forest because I wished to live free. I wanted to live deep and absorb the essence of life... ...”

Nature is constantly changing, it evolves, changes colors and textures throughout the seasons. Cycles of renewal and constancy!

Pales and delicate woods for a light, natural look. Striking Oaks and exotics woods with dark pores, splits and knotholes.

Striped, natural-colored design and lively grain, these linear woods fire the imagination.

Well-being and sensuality for body and soul need harmoniously designed environments

Notes

This image shows a single sheet of white paper with horizontal blue lines, similar to standard notebook paper. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.
